Risk Factors

This document is a financial promotion for the First Sentier Global Listed Infrastructure Fund in the EEA and elsewhere where lawful. Investing involves certain risks including:

- The value of investments and any income from them may go down as well as up and are not guaranteed. Investors may get back substantially less than the original amount invested.
- Single sector risk: investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
- Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- Listed Infrastructure Risk: the Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

Reference to specific securities (if any) is included for the purpose of illustration only and should not be construed as a recommendation to buy or sell. Reference to the names of any company is merely to explain the investment strategy and should not be construed as investment advice or a recommendation to invest in any of those companies.

For a full description of the terms of investment and the risks please see the Prospectus and Key Information Document.

If you are in any doubt as to the suitability of our funds for your investment needs, please seek investment advice.

If you are unsure of the terminology used in this report, please seek independent financial advice.

Portfolio Overview

31 December 2023

Investment objective and policy

The Fund aims to achieve income and growth on your investment.

The Fund invests at least 70% of its assets in listed shares of companies of any size that are involved in infrastructure around the world. The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, oil and gas storage and transportation. The Fund may invest up to 100% in companies of any size.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Fund Information

Fund Launch Date	27 June 2008
Fund Size (US\$m)	1037.7
Benchmark	FTSE Global Core Infrastructure 50/50 Net Index*
Number Of Holdings	41
Fund Manager(s)	Peter Meany/Andrew Greenup/Edmund Leung
Research Rating ^	Morningstar®:Silver

^{*} The benchmark changed from the UBS Global Infrastructure & Utilities 50-50 Index to the above on 01/04/2015. The benchmark of the Fund changed from FTSE Global Core Infrastructure 50-50 Gross to FTSE Global Core Infrastructure 50-50 Net with effect from 1 July 2016. This change has been reflected in the calculation of the benchmark performance.

Calendar Year Performance (% in USD) to 31 December 2023

These figures refer to the past. Past performance is not a reliable indicator of future results. For investors based in countries with currencies other than USD, the return may increase or decrease as a result of currency fluctuations. Since inception performance figures have been calculated from 11 December 2012. All performance data for the First Sentier Global Listed Infrastructure Fund Class III (Accumulation) USD as at 31 December 2023. Source for fund - Lipper IM / First Sentier Investors (UK) Funds Limited. Performance data is calculated on a net basis by deducting fees incurred at fund level (e.g. the management fee and other fund expenses), save that it does not take account of initial charges or switching fees (if any). Income reinvested is included on a net of tax basis. Source for benchmark - FTSE, income reinvested net of tax.

On 22 September 2020, First State Global Listed Infrastructure Fund was rebranded as First Sentier Global Listed Infrastructure Fund.

Commentary

31 December 2023

Market Review

A growing consensus that interest rate cuts were likely in 2024 drove a strong quarter for Global Listed Infrastructure, with gains for every infrastructure sector and region.

Performance Review

Mobile towers led the asset class higher, aided by falling bond yields and activist intervention for Crown Castle. North American freight railroads were supported by improving productivity metrics and indications of volume recovery, following a testing 2023. Water / waste rose on an improving regulatory outlook for UK water utilities, and robust earnings numbers from the US waste management sector. Toll roads performed well on solid traffic numbers and hopes of a soft landing for the global economy.

US infrastructure stocks performed well, reflecting robust gains for the region's tower, railroad and utility stocks. Infrastructure stocks in Japan lagged, having delivered strong returns earlier in the year on hopes of corporate reform and easing deflation.

Fund Activity

The Fund initiated a position in Eversource Energy, a regulated transmission and distribution-focused US utility with a healthy forecast Earnings Per Share growth rate of between 5% and 7% through to 2027. Uncertainty relating to the sale of its 50% stake in an offshore wind project off the south coast of Massachusetts, and concerns for higher interest rates, have weighed on its share price in recent months. We believe the stock is now trading at a substantial discount to intrinsic value.

A position in large-cap US waste management company Republic Services was divested during the quarter. Strong share price gains since the position was initiated in early 2021 reduced mispricing and moved the stock to a lower ranking within our investment process.

Outlook

The Fund invests in a range of listed infrastructure assets including toll roads, airports, railroads, utilities and renewables, energy midstream, wireless towers and data centres. These sectors share common characteristics, like barriers to entry and pricing power, which can provide investors with inflation-protected income and strong capital growth over the medium-term.

Toll roads remain the portfolio's largest sector overweight. These companies have benefited from a shift towards cars and away from public transport since the COVID-19 pandemic. To date, inflation-linked toll increases have had little impact on demand. Strong operating leverage (ie largely fixed costs as sales increase) has proved supportive of earnings growth. From here, we believe that improvements made to toll road networks in recent years provide scope for further growth in traffic volumes.

A substantial portion of the portfolio consists of utilities / renewables. Following a challenging 2023, these stocks face a more constructive outlook for 2024. Balance sheets are in better shape, customer bill pressures are declining and we could see a re-emergence of M&A activity. Capital expenditure growth should accelerate, reflecting the need for increased resiliency spend and higher electricity usage growth from data centres, industrial on-shoring and electric vehicles. However, this growth is also likely to require increased equity issuance.

The portfolio remains underweight energy midstream. Supportive oil and natural gas prices, robust LNG export levels and a disciplined approach to capital expenditure saw the sector generate strong free cash flow in 2023. This may allow energy midstream companies to increase dividend payments and carry out share buybacks, along with some M&A activity, in 2024. However, following strong share price gains in recent years, we

believe that greater mispricing can be found elsewhere within our opportunity set.

Portfolio Allocation and Stock Holdings

31 December 2023

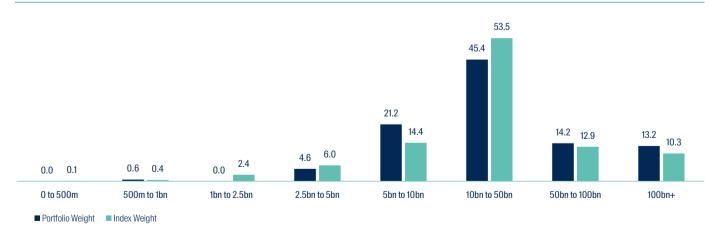

Ten Largest Holdings as at 31 December 2023

Stock Name	Country	Sector	Portfolio Weight (%)	Index Weight (%)

Stock Contributions show the impact of the individual stock's performance to the total fund performance. These stock contributions show the top 5 and bottom 5 contributors to the fund and are not representative of the performance of the fund as a whole.

These figures refer to the past. Past Performance is not a reliable indicator of future results. For investors based in countries with currencies other than USD, the return may increase or decrease as a result of currency fluctuation.

This stock information does not constitute any offer or inducement to enter into investment activity.

Contributions are calculated at the investee company level before the deduction of any fees incurred at fund level (e.g. the management fee and other fund expenses) but after the deduction of transactional costs

Stocks held/listed in non-index countries have economic activity > 50% from developing economies.

* A basis point is a unit of measure used in finance to describe the percentage change in value or rate of a financial instrument. One basis point is equivalent to 0.01% (1/100th of a percent) or 0.0001 in decimal form.

Data source: This information is calculated by First Sentier Investors.

Risk Analysis

31 December 2023

Portfolio Risk Analysis - Ex-Post 3 Years Annualised to 31 December 2023

Risk Measure	Value	Risk Description
Beta	1.02	Beta is a measure of volatility relative to the market. A beta of 1 would indicate that the fund tended to move in line with the market; a beta greater than 1 would indicate that the fund has been more volatile than the market; whereas a beta less than 1 would indicate that the fund has been less volatile than the market.
Information Ratio	0.17	The fund's excess return divided by its tracking error. It is designed to assess a portfolio's performance relative to its level of benchmark risk. The higher the fund's information ratio, the more excess return it generates for each unit of tracking error.
Portfolio Standard Deviation	16.23%	A measure of how much the returns of the fund vary relative to the arithmetical average. The higher the fund's standard deviation, the more its returns tend to deviate from the mean.
Benchmark Standard Deviation	15.71%	A measure of how much the returns of the index vary relative to the arithmetical average. The higher the index's standard deviation, the more its returns tend to deviate from the mean.
Tracking Error	2.03%	The standard deviation of the difference between the fund's returns and those of the index. The higher the fund's tracking error, the more its performance relative to the benchmark may vary.

Portfolio Risk Analysis - Ex-Ante at 31 December 2023

Value	Risk Description
3.80%	The annual dividend yield paid per share divided by the share price. This factor measures the value of company shares according to the stream of dividend income resulting from share ownership.
3.50%	The annual dividend yield paid per share divided by the share price. This factor measures the value of company shares according to the stream of dividend income resulting from share ownership.
2.14	The ratio of the company's book value (the sum of shareholders' equity plus accumulated retained earnings from the P & L account) to its share price. This factor has been one of the most successful measures of the intrinsic value of company shares.
1.96	The ratio of the company's book value (the sum of shareholders' equity plus accumulated retained earnings from the P & L account) to its share price. This factor has been one of the most successful measures of the intrinsic value of company shares.
17.98	Annual earnings (adjusted for amortizations of intangibles, extraordinary charges and credits) per share divided by the share price. This factor measures the worth of a company's ability to support each share with after tax earnings.
16.34	Annual earnings (adjusted for amortizations of intangibles, extraordinary charges and credits) per share divided by the share price. This factor measures the worth of a company's ability to support each share with after tax earnings.
	3.80% 3.50% 2.14 1.96 17.98
